## **DETAILED ACTION**

## Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6, drawn to a pharmaceutical composition, 1<sup>st</sup> product.

Group II, claims 7-10, drawn to a nucleic acid composition, 2<sup>nd</sup> product.

Group III, claims 11-17, drawn to a method of treating a disease comprising administering an immune modulatory nucleic acid (5'-purine-pyrimidine-[X]-[Y]-pyrmidine-pyrimidine-3').

Group IV, claims 18-24, drawn to a method of treating a disease comprising administering an immune modulatory nucleic acid (5'-purine-purine-[X]-[Y]-pyrmidine-pyrimidine-3').

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Application/Control Number: 10/524,643

Art Unit: 1645

The special technical feature of Group I is drawn to a pharmaceutical composition comprising an immune modulatory nucleic acid comprising a hexamer region of formula 5'-purine-pyrimidine-[X]-[Y]-pyrmidine-pyrimidine-3', X and Y cannot be cytosine-guanine, and a pharmaceutically acceptable carrier.

Page 3

The special technical feature lacks novelty under PCT Article 33(2) because it is anticipated by Krieg et al (Nature, 1995, 374:546-549). Krieg et al discloses pharmaceutical composition comprising an immune modulatory nucleic acid comprising a hexamer region of formula 5'-purine-pyrimidine-[X]-[Y]-pyrmidine-pyrimidine-3', X and Y cannot be cytosine-guanine, and a pharmaceutically acceptable carrier (see Table 1, see for example 3M). The nucleic acid molecule is administered in PBS, a pharmaceutically acceptable carrier (see p. 547).

Group I is the main invention in this application and lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept. Inasmuch as the technical feature does not define a contribution over the art, it is not "special" within the meaning of PCT Rule 13.2. Consequently, Groups I-IV lack unity of invention.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If

Application/Control Number: 10/524,643 Page 4

Art Unit: 1645

the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. M. Minnifield whose telephone number is 571-272-0860. The examiner can normally be reached on M-F (8:00-5:30) Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Siew can be reached on 571-272-0787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
